SARCINA LUCRĂRII

Parcurgerea cursurilor Python propuse:

- https://www.learnpython.org/
- https://www.codedex.io/python

DESFĂȘURAREA LUCRĂRII

Codedex

Hello World

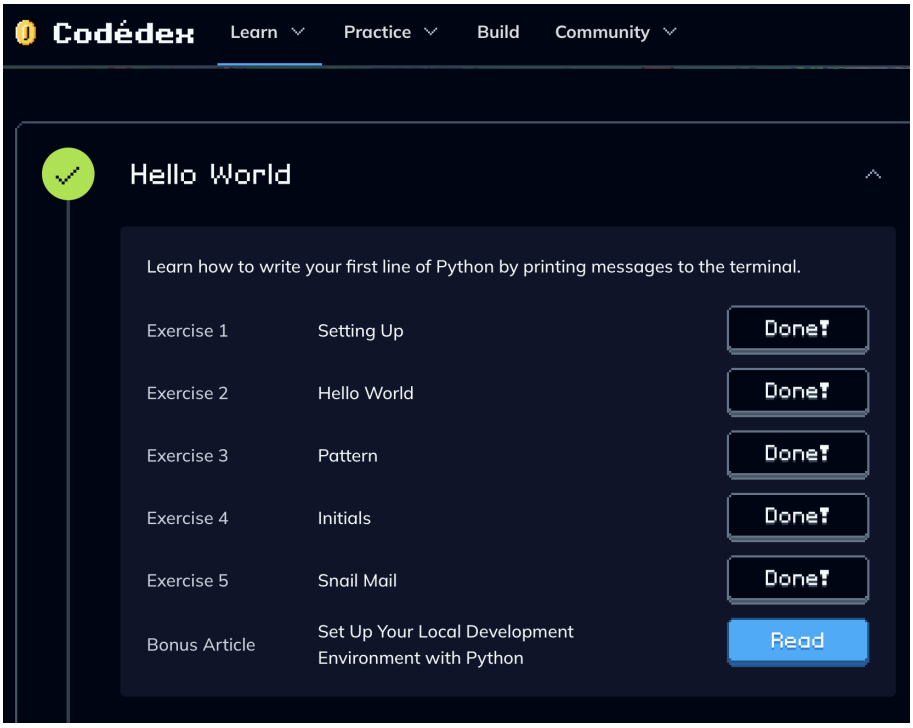

Figura 1.1 - Hello World

Primul capitol Codedex a constat în însușirea mai multor metode de utilizare a funcției „print()”.

Variables

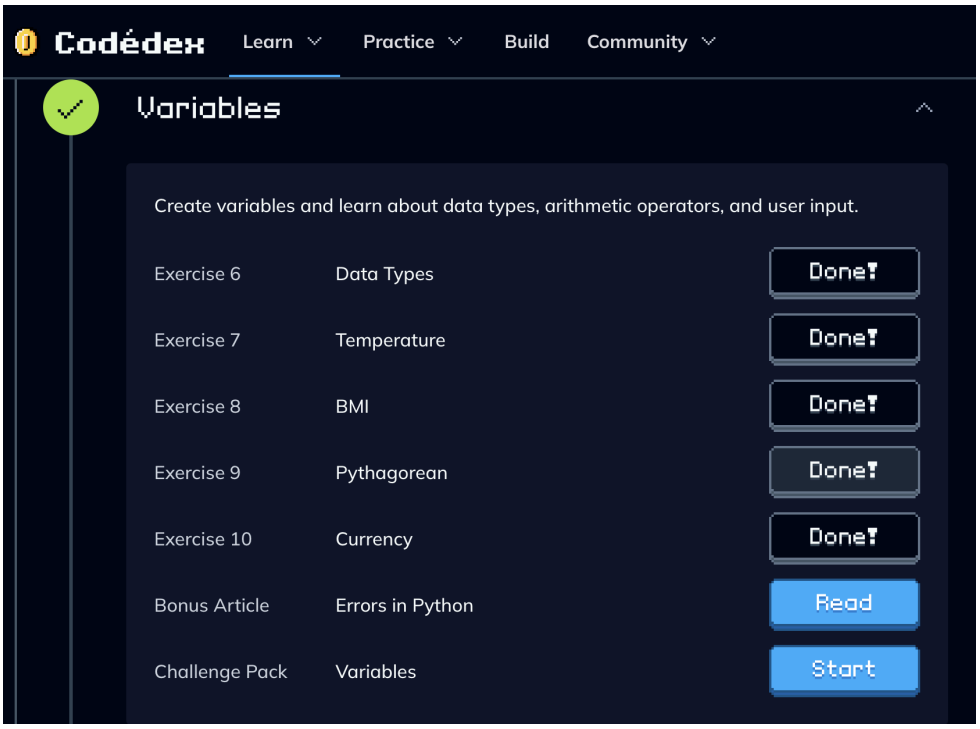

Figura 1.2 - Variables

Capitolul 2 a introdus noțiunea de variabilă și de introducere a datelor de către utilizator (input). Aici au fost realizate mici programe pentru calcul, conversia valorilor și a valutei.

learnpython.org

Hello, World!

Figura 1.3 - Hello, World!

Funcția „print” a fost completată cu textul „Hello, World!”.

Variables and Types

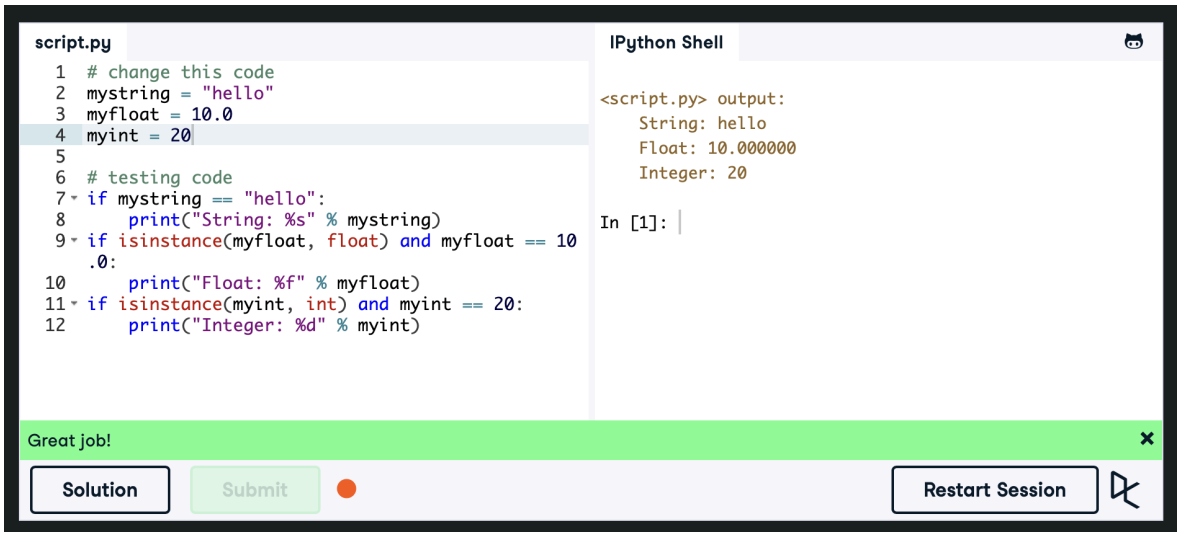

Figura 1.4 - Variables and Types

Primele trei variabile au fost completate cu valorile necesare pentru ca să fie îndeplinite condițiile if din liniile 7, 9 și 11.

Lists

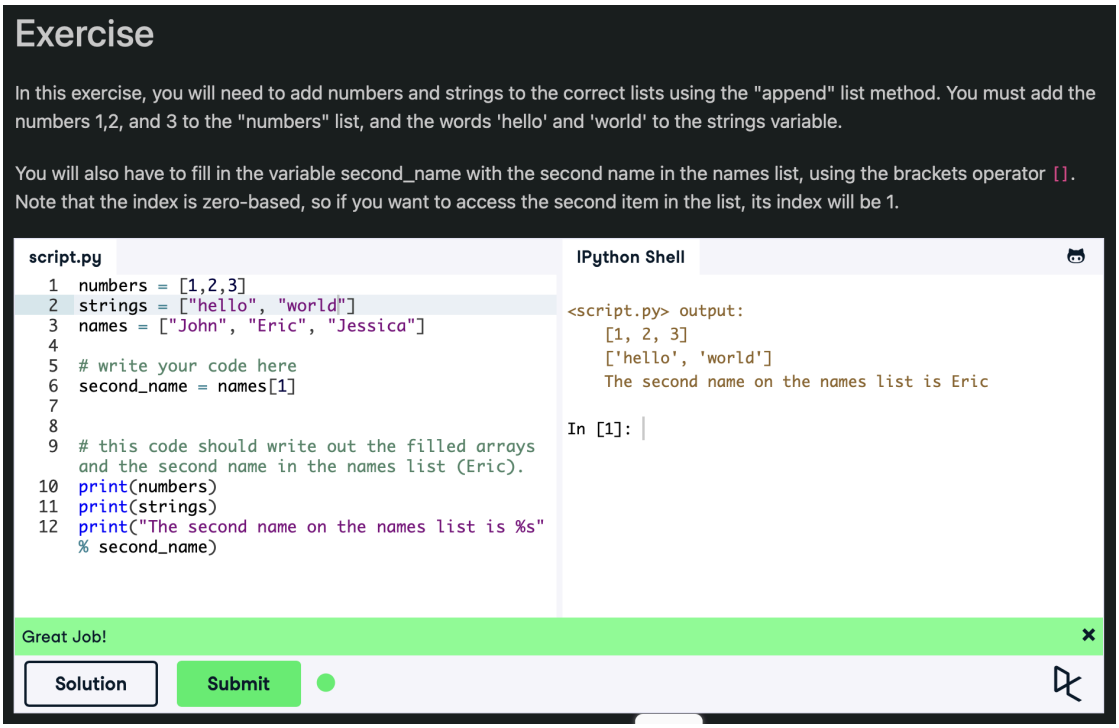

Figura 1.5 - Lists

Basic Operators

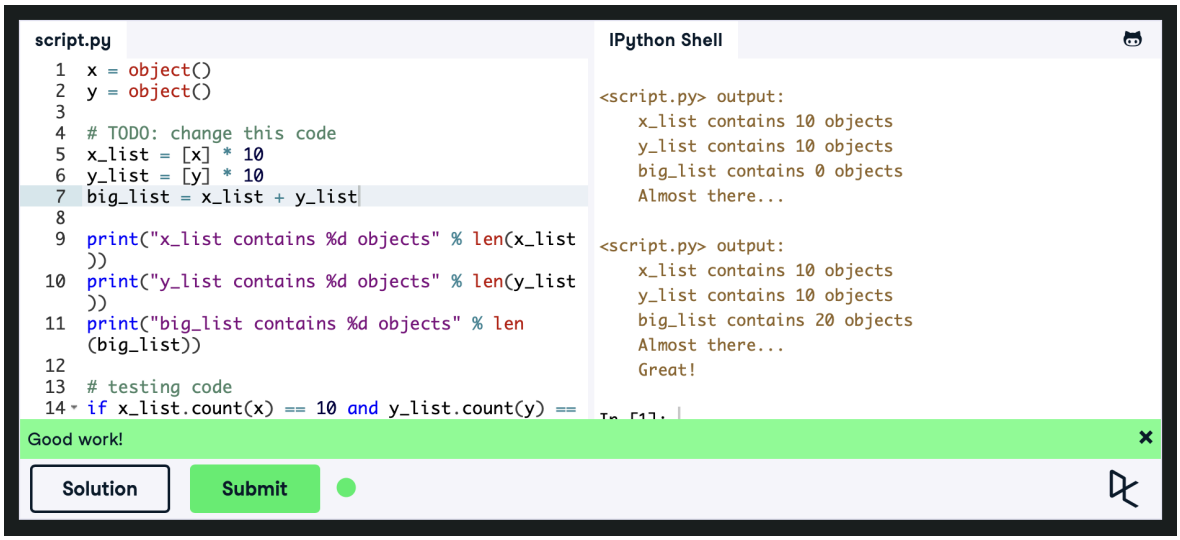

Figura 1.6 - Basic Operators

String Formatting

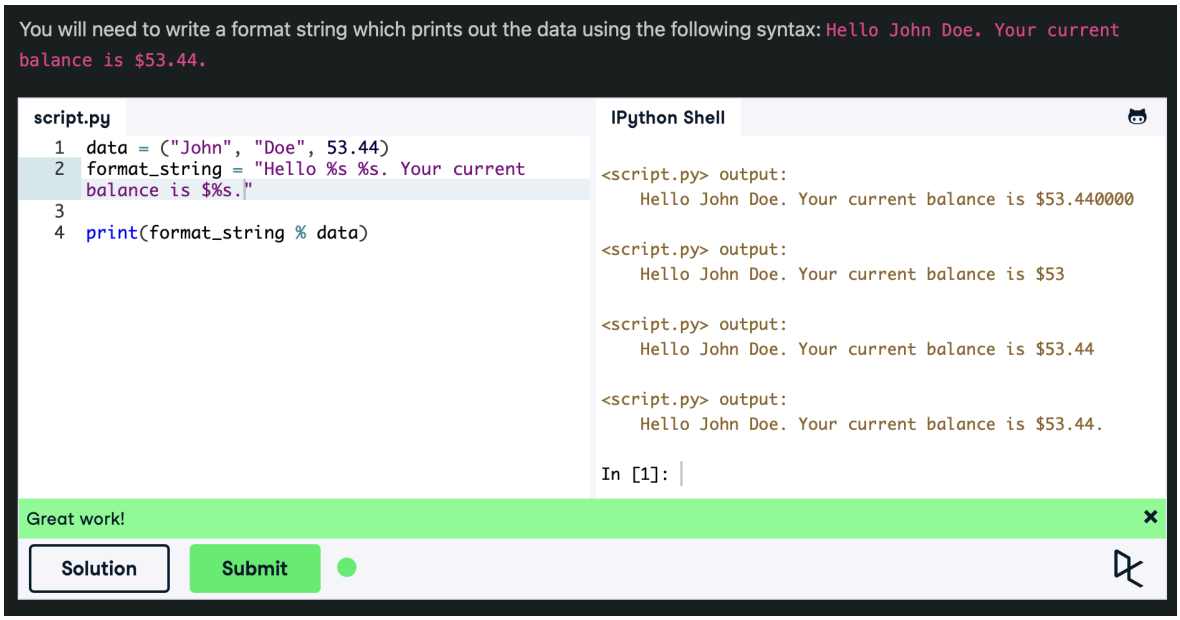

Figura 1.7 - String Formatting

Basic String Operations

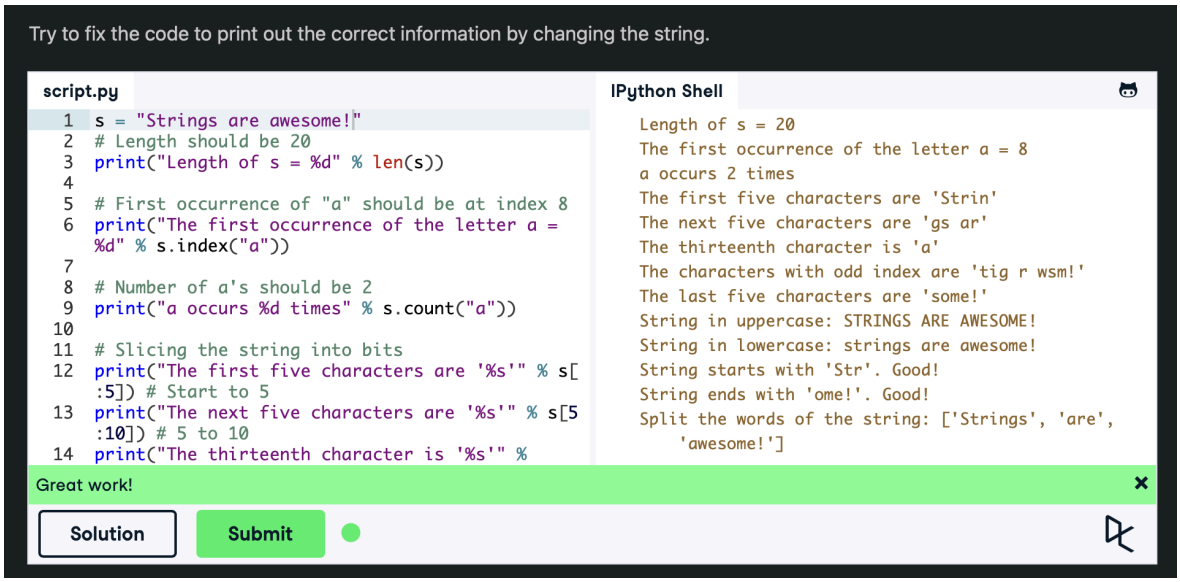

Figura 1.8 - Basic String Operations

Conditions

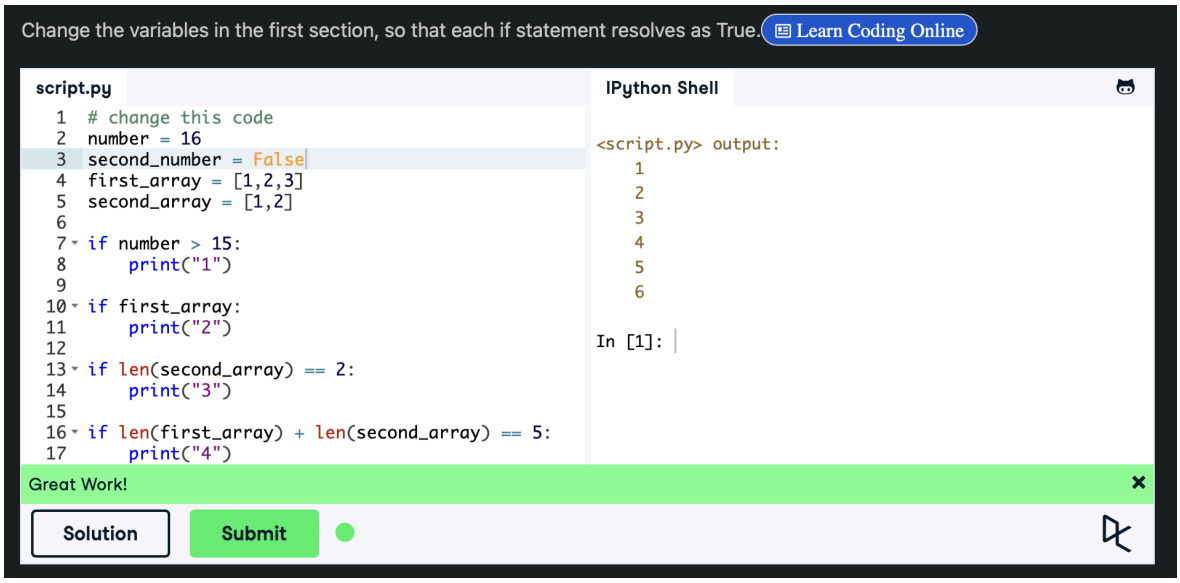

Figura 1.9 - Conditions

Loops

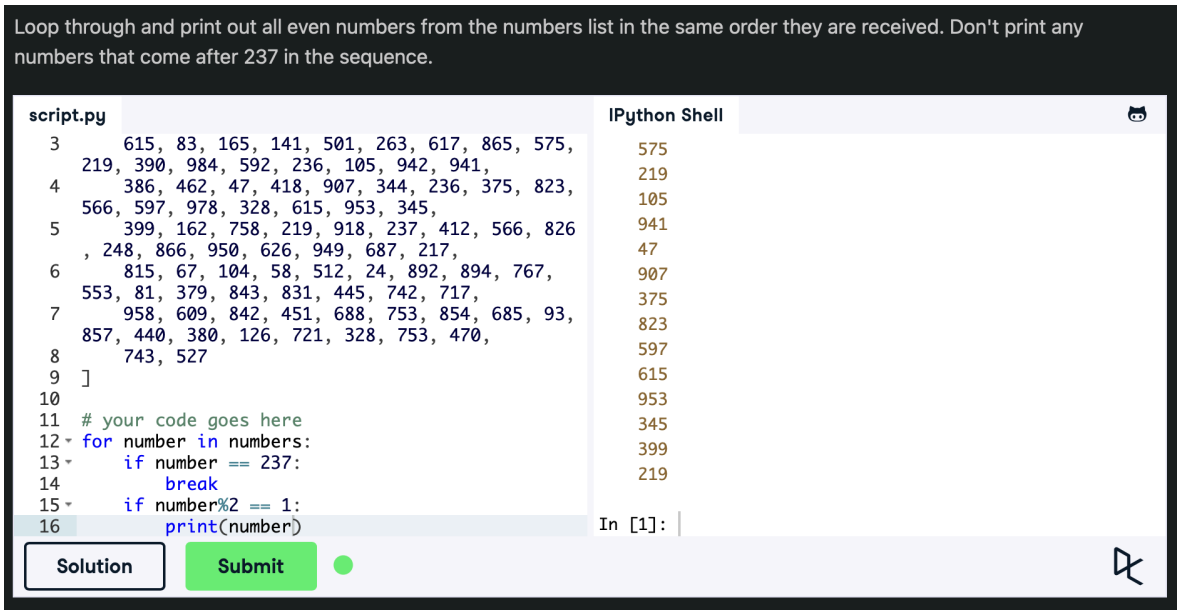

Figura 1.10 - Loops

Functions

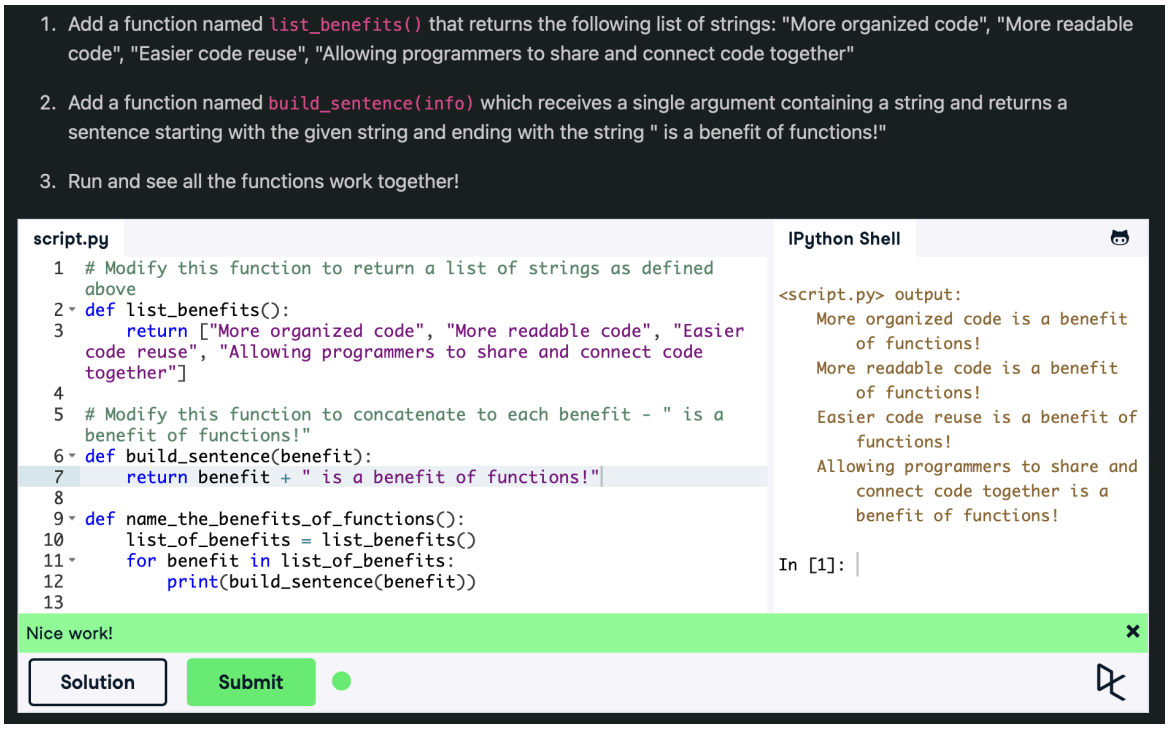

Figura 1.11 - Functions

Classes and Objects

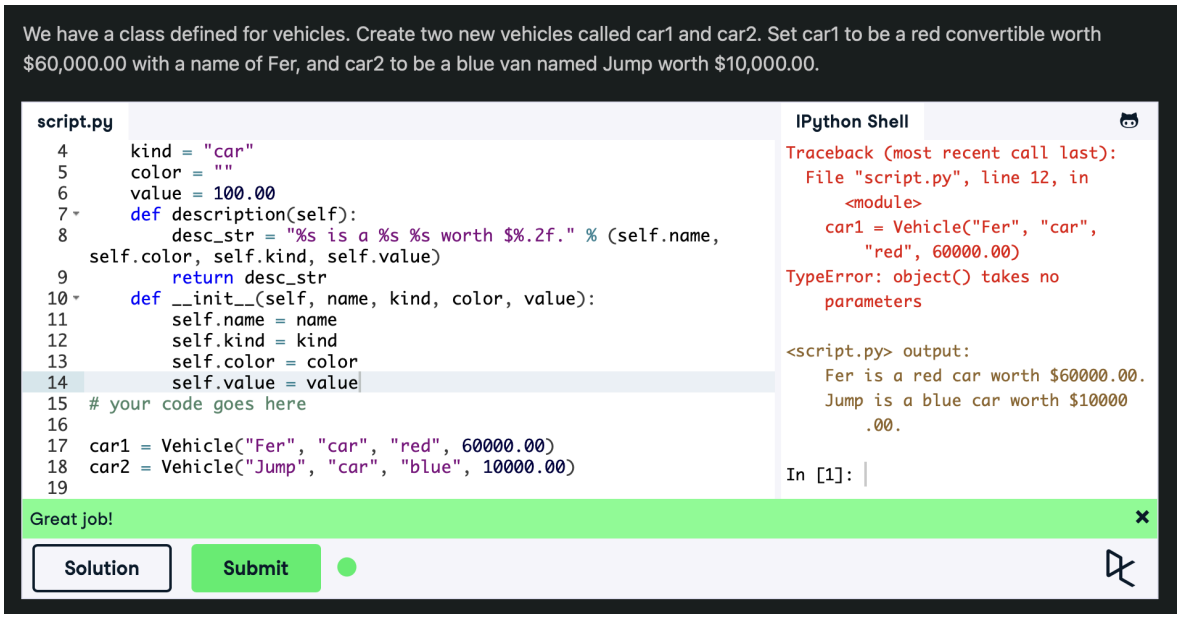

Figura 1.12 - Classes and Objects

Dictionaries

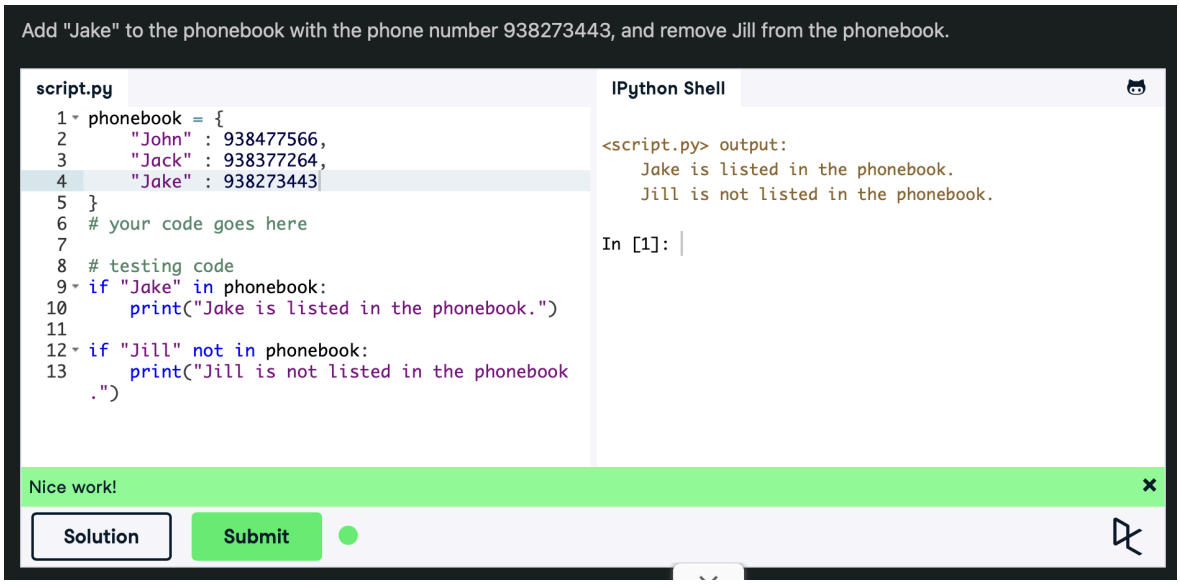

Figura 1.13 - Dictionaries

Modules and Packages

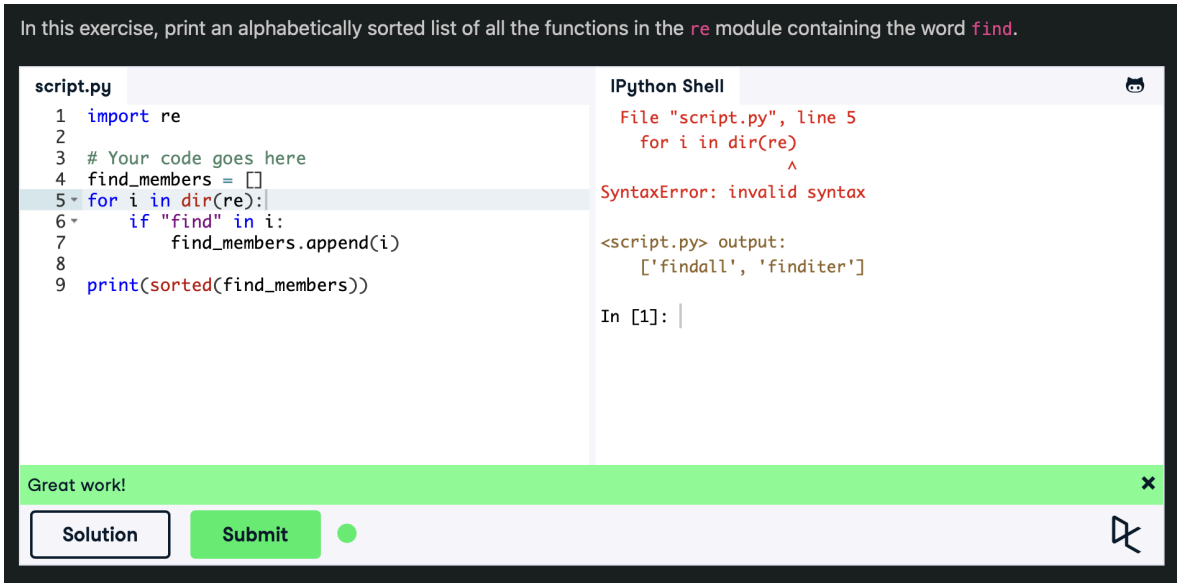

Figura 1.14 - Modules and Packages

Input and Output

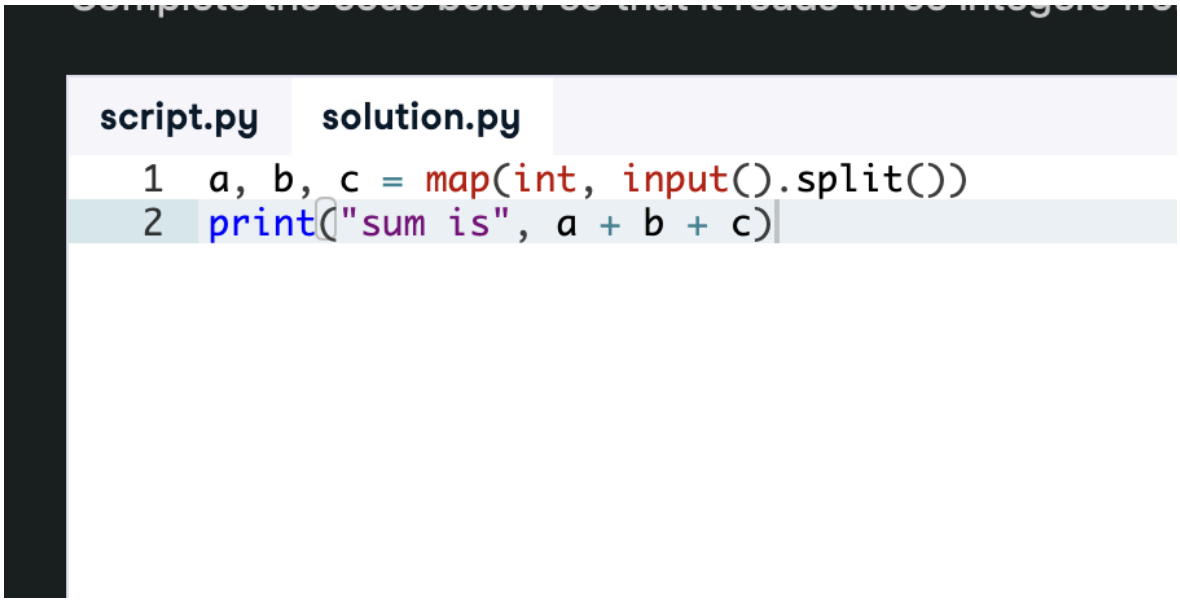

Figura 1.15 - Input and Output

Generators

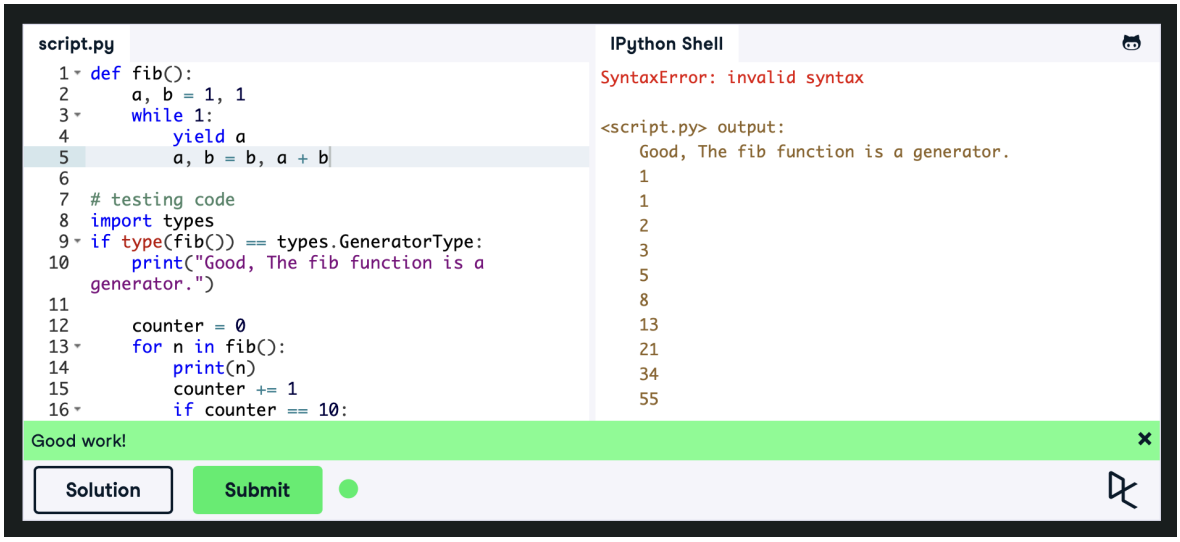

Figura 1.16 - Generators

List Comprehensions

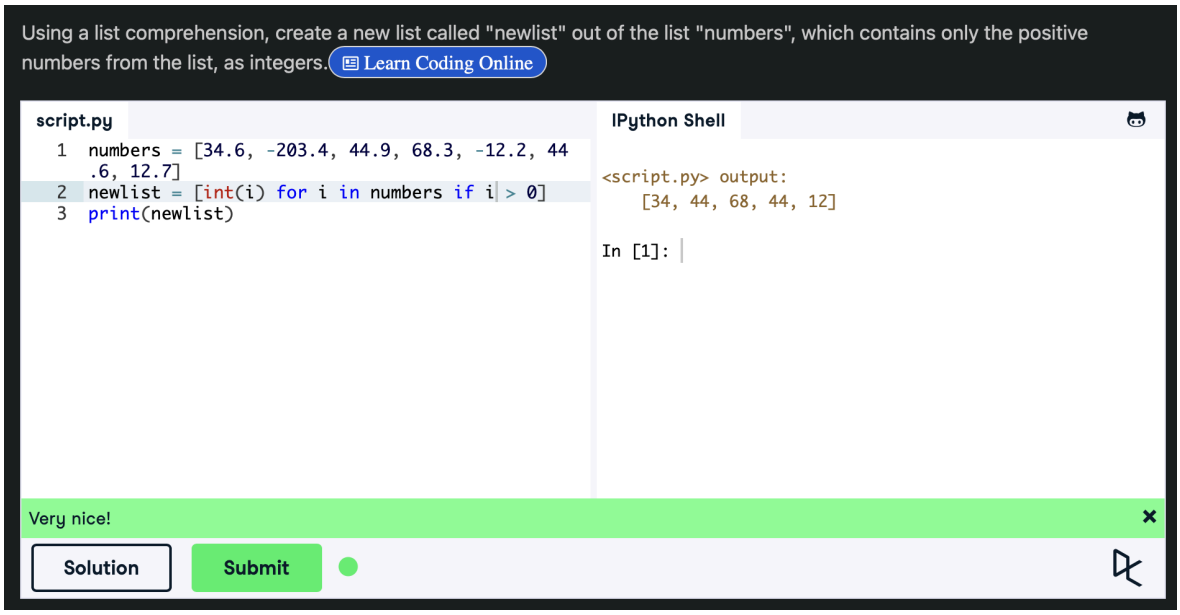

Figura 1.17 - List Comprehensions

Lambda functions

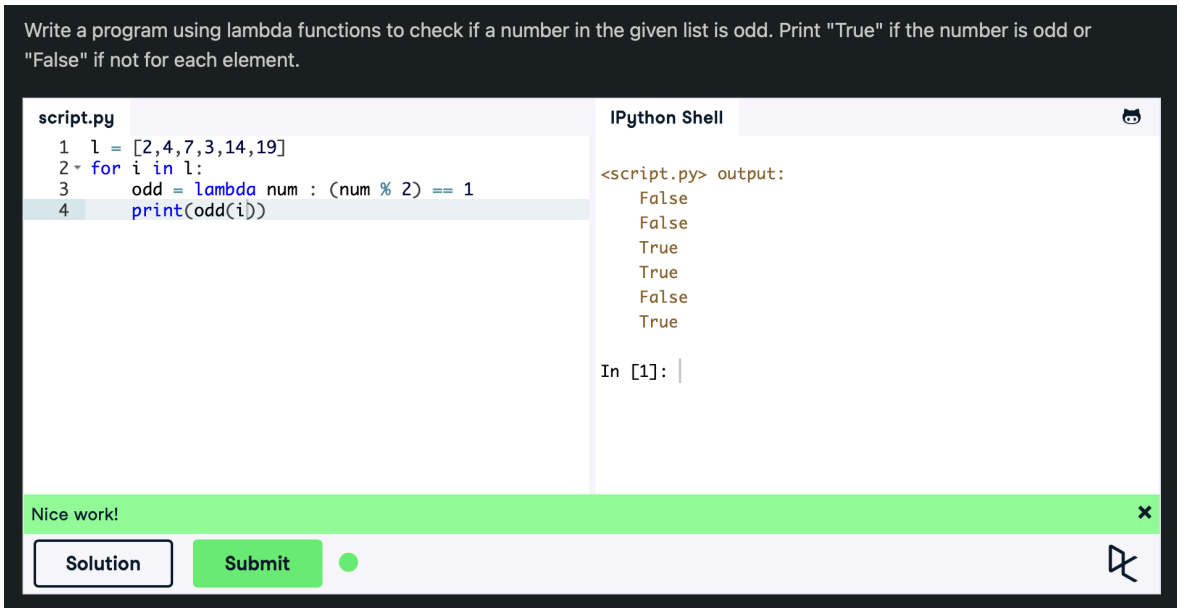

Figura 1.18 - Lambda functions

Multiple Function Arguments

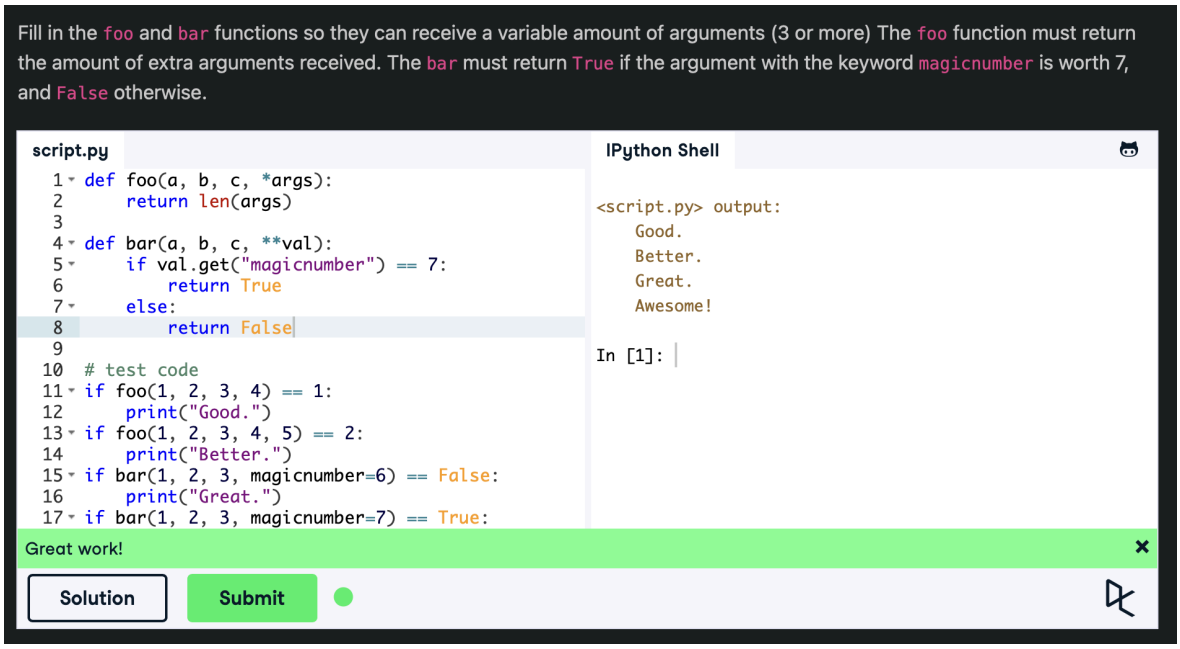

Figura 1.19 - Multiple Function Arguments

Regular Expressions

Figura 1.20 - Regular Expressions

Exception Handling

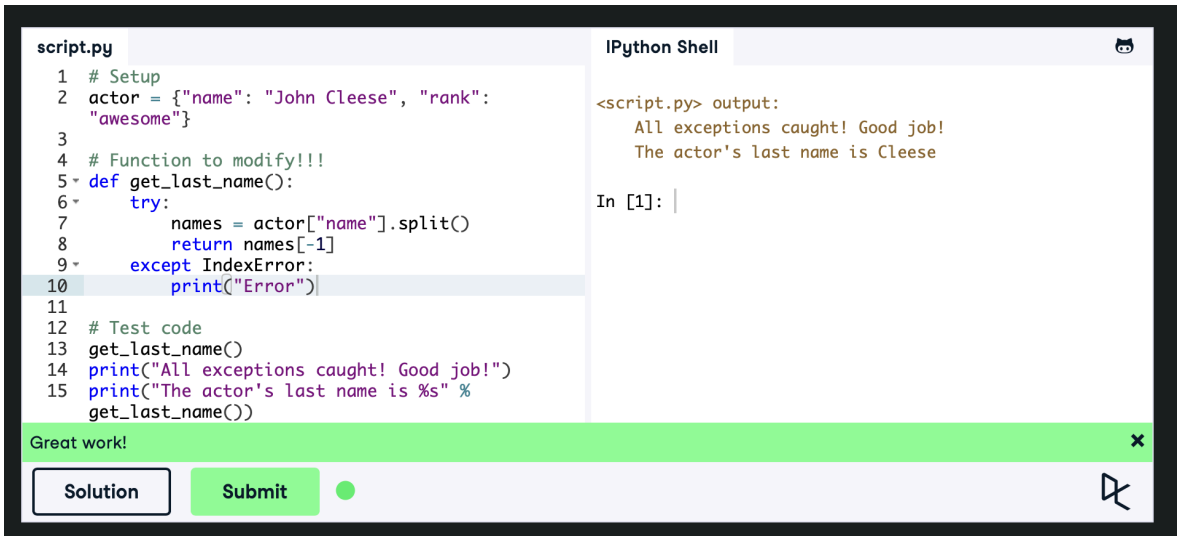

Figura 1.21 - Exception Handling

Sets

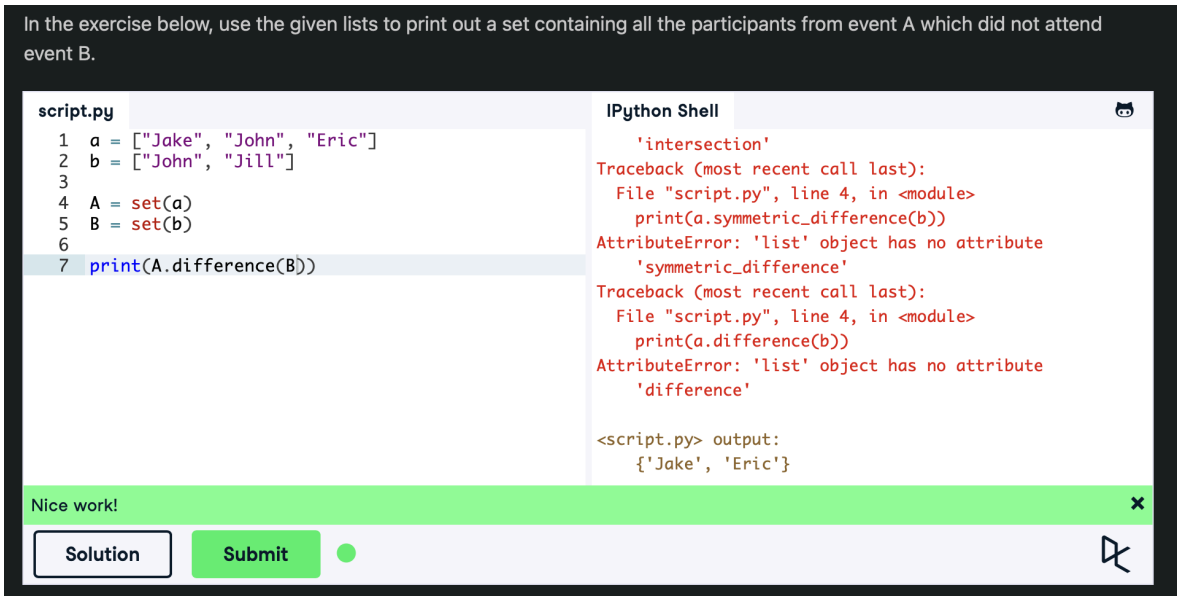

Figura 1.22 - Sets

Serialization

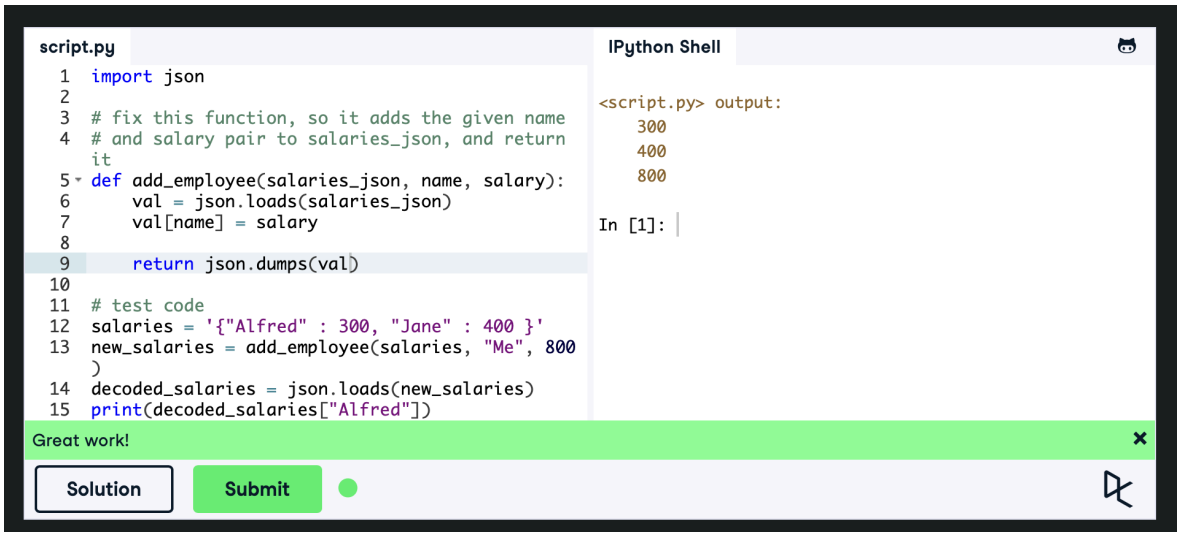

Figura 1.23 - Serialization

CONCLUZII

În cadrul aceste lucrări am parcurs cursurile python pe platformele codedex si learnpython.org in care au fost studiate bazele limbajului: variabile, tipuri de date, operatorii, liste, dicționare, funcții, clase, module, excepții etc.
Exercițiile din cadrul cursului au fost rezolvate în redactor online (cu verificare). Python s-a dovedit a fi un limbaj clar și ușor de aplicat la o rază mare de sarcini. Acesta poate fi folosit atât pentru creare unor mici scripturi, cât și pentru unele aplicații complexe
